## **Protective Cover for Amico and Amica**

As with most portable products, Amico can be subject to unintentional abuse. Keep your “friend’s” real teak wood veneer looking good with our removeable Protective Cover, custom designed to fit Amico.

Manufactured from premium silicone, the seamless 3 mm (0.12”) casing is soft and flexible, yet durable, without adding significant bulk or weight. In addition to providing reliable protection against bumps and scrapes, the Protective Cover also offers splash resistance and makes Amico easier to grip.

The open front and rear design allow quick access to controls and inputs/outputs with no covers or flaps to open, and the one-piece design makes for easy-on, easy-off. The skin will also fit the Amica dedicated right channel speaker.

The Protective Cover is a cost-effective way to protect your Como Audio portable music system.

Tastefully presented in stylish matte charcoal with the Como Audio logo embossed in the top.

Weight: 0.74 lb./335 g

Material: Silicone

Amico/Amica not included.
