

 COMO AUDIO

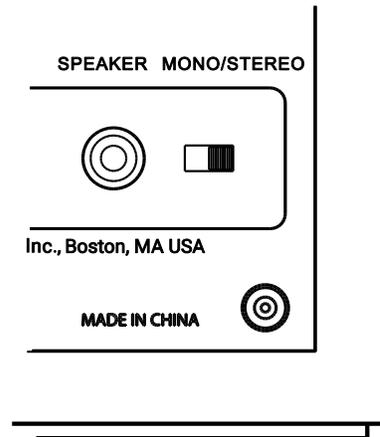

Blu Speaker

Quick Start Guide

Your guide to the Como Blu Speaker

1. Fully insert the red male RCA connector on the end of Como Blu Speaker's audio cable into the female RCA "SPEAKER" output on the back of Como Blu.

2. Place the audio switch on the back of Como Blu in the "STEREO" position.
3. The further away you place the Como Blu Speaker from Como Blu, the wider the soundstage will be. For accurate reproduction, when facing the units, Como Blu should be on the left side and the Como Blu Speaker on the right since all right channel audio will be sent to the Como Blu Speaker.

Important notes:

Do not use the Como Blu Speaker for any purpose other than the dedicated right channel for Como Blu.

Do not obstruct Como Blu Speaker's rear bass port. Placing the Como Blu Speaker in a bookshelf or corner will exaggerate the bass.

*Wood is a product of nature, and as such, has characteristics that can vary greatly. Although every effort has been made to reasonably match your Como Blu Speaker to Como Blu, **differences should be expected**. It is precisely these naturally occurring variations that provide the uniqueness of each wood cabinet.*
